SUMMARY

Associate Software Engineer with expertise in Flutter and MERN stack development. Skilled in building responsive, scalable applications and integrating real-time databases and secure authentication.

EDUCATION

Bachelor of Science in Computer Science, University of Gujrat, Main Campus — Aug 2024
CGPA: 3.53

SKILLS

Programming Languages	HTML, Tailwind CSS, React (Vite), Kotlin, Bootstrap, C#.NET, Python, SQL
Frameworks & Libraries	Flutter (Dart, Firebase CLI, Provider), MERN, Jetpack Compose
Soft Skills	Team Collaboration, Problem-Solving, Communication, Time Management

EXPERIENCE

Flutter Developer — Nov 2023 - April 2024
Health Bridge — *Gujrat, Pakistan*

- Built responsive and user-friendly mobile app using Flutter and Provider, Firebase CLI and Google OAuth.
- Integrated Firebase for real-time database management, authentication, and push notifications, ensuring smooth data synchronization and secure user interactions.

Web Developer — May 2024 - Sep 2024
National Incubation Center — *Gujrat, Pakistan*

- Developed full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js), enhancing user engagement by delivering a seamless and responsive interface.
- Created web application significantly boosting their online presence and user interaction.

PROJECTS

DevNBlog App | MERN, Firebase, Google OAuth, Redux | [Live Demo](#) | [GitHub Link](#)

- DevNBlog is a dynamic blog application featuring JWT-based authentication and Google OAuth, enabling secure admin access for managing posts and comments through CRUD operations.
- The app is fully responsive, includes a dark mode, and offers advanced search functionality, allowing users to interact by leaving, editing, and deleting comments on posts.

Car Rental App | Flutter, Firebase, Open Street Maps | [GitHub Link](#)

- Developed a cross-platform car rental application using Flutter, following Clean Architecture principles to ensure scalability and maintainability, with Bloc for efficient state management.
- Integrated Firebase for real-time database and incorporated OpenStreetMaps for enhanced mapping, allowing users to locate cars and navigate seamlessly.

Shopping App | Flutter, Provider, Firebase | [GitHub Link](#)

- Developed a Shop App using Flutter, Provider for state management, and Firebase for backend services, delivering a responsive shopping experience on both iOS and Android.
- Implemented a scalable architecture featuring product listings, a shopping cart, product details functionalities, and real-time data synchronization using Firebase.
